DECLARATION OF CONFORMITY – REACH

Dear Client,

Reach is the acronym for Registration, Evaluation, Authorization of Chemicals, the new European Regulation that has been in place since 1st June, 2007. Its main objective is the regulation of the correct use of chemical substances. REACH takes care of the registration of new substances and of substances already on the market for the European Community.

Fabryka Narzędzi Specjalnych FERMOT S.A., in terms of REACH Regulation is "downstream user" as product manufacturer using low quantities and therefore no subject to registration.

Fabryka Narzędzi Specjalnych FERMOT S.A. declares and guarantees

That products manufactured by us, in our production facility in Skierniewice (PL), **do not discharge, under normal reasonable use**, any dangerous substances for human health nor the environment. This fundamental prerogative does not come under the conditions of Art. 7 paragraph 1, Chapter 1, Title 11 and therefore **exempts us** from registration and notification of chemical substances contained within products.

We cannot, instead, guarantee our products if not used within the limits of the "normal" use for which they were designed.

All other conditions of use of our products (high-low temperature, pressure, depressurization, contact with chemical and/or biological substances and any other situation that has not expressly been specified as normal use) must be communicated to the proper Office, which will then evaluate each case.

Therefore, for what has been mentioned above we declare that products produced by us perfectly meet the requirements set out by Regulation (CE) No. 1907/2006, called REACH.

Tomasz Łajko
President of the Company

Skierniewice, 24th of July, 2023
